Academic and Practical Projects

Full Stack E-Commerce Admin CMS
- Developed a highly scalable and performant Admin CMS capable of handling large inventories, orders, categories, and products with fast loading times.
- Implemented debouncing in search to minimize network calls and provide a high-performance experience with search results loading in lesser time.

Tech Stack: *React, Node, Express, MongoDB.*
Code: Frontend Admin Front-End
Code: Backend API CMS

Full Stack E-Commerce Client Store
- Created a responsive and user-friendly frontend client store, ensuring seamless browsing and shopping experiences across devices.
- Implemented caching and supported n-level nested comments, providing enhanced functionality and improved user engagement.

Tech Stack: *React, Node, Express, MongoDB.*
Live: Frontend Client Store
Code: Frontend-client-store-code

Movie App - [**Tech Stack**: *React, Bootstrap, Redux, react-router, Axios]*
This is a simple movie app that uses the OMDb API to search for movies and display their details.

Live: Movie app

Code: movie-app-code

Finance Tracker - [**Tech Stack**: *React, Node, Express, MongoDB.*]
It's your Finance Tracker App that helps you to track your financial expenses and income.

Link: Finance-Tracker

Code: Finance-Tracker-code
